

MODEL RPB001 REMOTE PANIC BUTTON

OPERATION

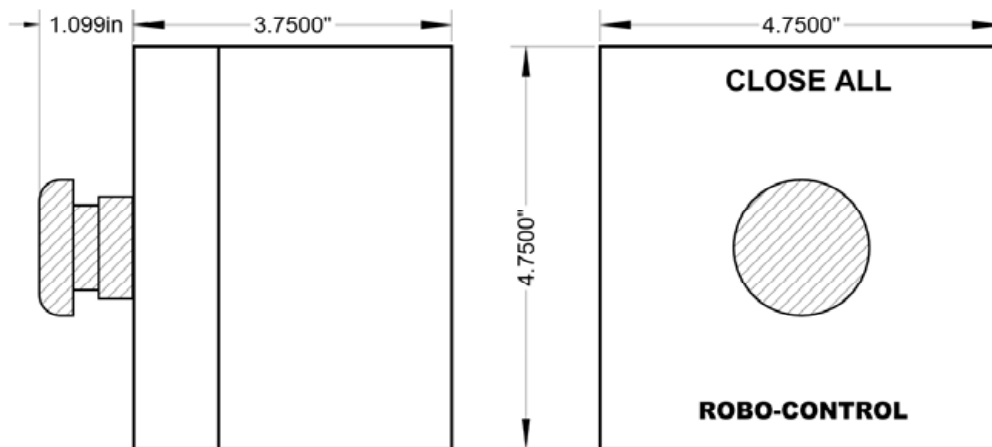

The Model RPB001 is a mushroom pushbutton mounted in a polycarbonate enclosure. The package is designed to offer operators the ability to close all actuators at one time from a remote location. The enclosure switch is compatible with chlorine and sulfur dioxide containment areas. The twist to unlock normally-open switch is rated at 10 Amps at 230 VAC.

ADDITIONAL INFO

The device is designed to operate in conjunction with all ROBO Control Actuators and Control Panels.
